

"WE KNOW WHAT WE'RE DOING"

NEWSLETTER February 2010

Issued by

Technical Maintenance & Service Co., Inc.

4231 Progressive Ave, Suite 3, Lincoln NE 68504

402-467-3750 tms@tmscoinc.com www.tmscoinc.com

Greetings, Welcome to the first installment of the TMS Newsletter. TMS is a control systems integration company that primarily serves the Water and Wastewater industry. The company was started in 1984 but has been under the current ownership since 2000. TMS serves all of Nebraska and Western Iowa, as well as parts of surrounding states.

TMS has a knowledgeable, friendly staff with years of experience. The President of the company, Lincoln Williams, is a registered Nebraska P.E. in Control Systems Engineering. There are 7 employees with offices in three locations. We have experience with a variety of PLC hardware, software, instrumentation and VFDs. Employees are continually attending classes to keep up to date in the industry as well as learn new platforms.

TMS has a large customer base and we pride ourselves on our service and customer satisfaction. We are sincere about building a customer relationship that will last for years, not just making the fast buck. We believe in doing what is best for our clients in the short term and for the future.

At TMS we are always trying to provide systems that are not only more reliable but also help save you money. It is our position that a control system is not just a necessary expense, but it can also pay for its self. There are a number of ways in which your SCADA/control system can save you money. And a penny saved is a penny earned!

We have already identified many areas that can provide savings and TMS is embarking on some research to quantify some of these potential savings as well as identify additional ways of capitalizing on your control system investment.

This newsletter will highlight new developments in technology in addition to our own research findings. We will provide results from case studies as well as recognize customers for their achievements. We will include reminders for customers, possibly have a small for sale list, a joke or two and maybe even a colorful story from Chris. We will have a spot for feedback on our web site as well as more detailed information on our stories, studies and information about TMS.

Back Row left to right: Chad, Lincoln, Chris, Joel
Front Row: Randy, Deb, Mitch

TMS supplies complete control systems, PLCs, Telemetry, SCADA, touch screens,

Instruments,

And YES we do VFDs.
